Getting Started •• General Information

Site Preparation

Site preparation, including any necessary permits or licenses, is the responsibility of the purchaser. Your site must be large enough to accommodate the unit and all necessary clearances. If the unit will be indoor, carpeting should be installed prior to unit installation. An outdoor site should be secured and preferably surrounded by a fence. Detailed plans to create a unit proposal by Playsystems must include the following information:

1. Floor plan showing location and dimensions of doors, windows, walls, columns, fences, ceiling height, etc.
2. Play unit height impediments such as signs, ceilings, light fixtures, HVAC structures, etc.
3. Existing or proposed structures such as tables, other play elements, benches, booths, etc.
4. Elevation changes such as steps or ramps.
5. Proposed surface finishing or play system area.

Terms

Exact costs will be submitted in your Purchase Agreement. We require a deposit at the time the Purchase Agreement is signed. The remaining balance is due according to the terms in the agreement. For your convenience, you may pay the remaining unpaid balance with a wire transfer. Playsystems accepts both wire transfers and 100 percent Letters of Credit for international sales. Your Playsystems representative can provide you with specific details.

Shipping

All freight charges are FOB Carrollton, Georgia U.S.A. Freight charges are additional and are not included in the selling price of the equipment. Transit time is dependent upon your location.

Installation

Installation charges are additional and are not included in the selling price of the equipment. These charges will be

To order call 770-832-6660 or fax : 770-214-0747
1050 Columbia Drive Carrollton GA 30117 USA

included in your unit Proposal presented by Playsystems. Installation of equipment can be provided by Playsystems qualified installation technicians. (Some toddler units may not require certified technicians and will come with instructions, if applicable.) The time necessary for installation will depend on the unit you purchased.

Warranty

Products are warranted to the original purchaser against defects in workmanship and material for the time period indicated on your Purchase Agreement. Warranties do not cover units that have been exposed to excessive wear and tear, vandalism or negligence. Our Customer Service Department is available to answer any questions you have regarding replacement parts and product information.

Now Let's Get Started -- Ordering Process An Overview of Procedures

- * Contact your Playsystems representative to discuss your site and budget information.
- * Playsystems will submit to you proposed site plans and pricing.
- * Review and sign approved site plans and cost estimate.
- * Sign the Purchase Agreement and pay deposit.
- * Pay final unit payment.
- * Installation of your unit.

Dear Customer,

At **Playsystems by Childworks**, a division of Superior International Industries, we are excited to present to you our soft contained playgrounds catalog.

We founded Superior International Industries, Inc. with the focused goal of providing products and services to the playground industry. Our group of professional playground manufacturers has been producing commercial play equipment for over 17 years. Our other related playground products include commercial outdoor playgrounds, safety surfacing and playground components.

Our company is a worldwide supplier of playground to restaurants, amusement parks, schools, community centers, child care facilities and water parks.

In this catalog you will find several playgrounds that provide children ages 2 to 12 years old with a secure protective environment suitable for challenging and exploring their own capabilities.

Our multicolor playgrounds are designed with imagination, technology and experience on mind.

Our playgrounds offer a safe haven for children through our top quality materials and our enclosed play structures.

Our company is located in Carrollton Georgia, about 30 minutes away from Atlanta. Our in house manufacturing capabilities such as rotomolding, steel fabrication and powder coating, allows us to build playgrounds that offer innovative designs and great value.

As with any company that has been in business and successful for many years, we pride ourselves on meeting some of the industry's strictest safety standards:

ASTM = The American Society for Testing and Material

ADA = **Americans** with Disabilities Act of 1990

We invite you to allow us to prepare your playground like many satisfied playground owners who have entrusted **Playsystems by Childworks** with their project.

Sincerely,
Rob Pepper

Product Specifications

1.9" O.D. Galvanized Pipe and cast aluminum fitting are used for the structure of the playground. We also use 5" O.D. pipe and cast aluminum fittings for cantilevering over seating or other structures as shown, for a strong durable playground.

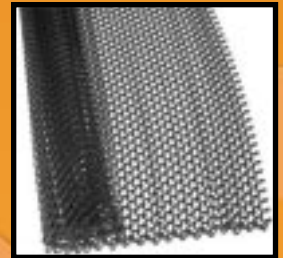

All structural Plastics are 3/8" low density polyethylene with UV stabilizers for long life. The Strongest in the industry.

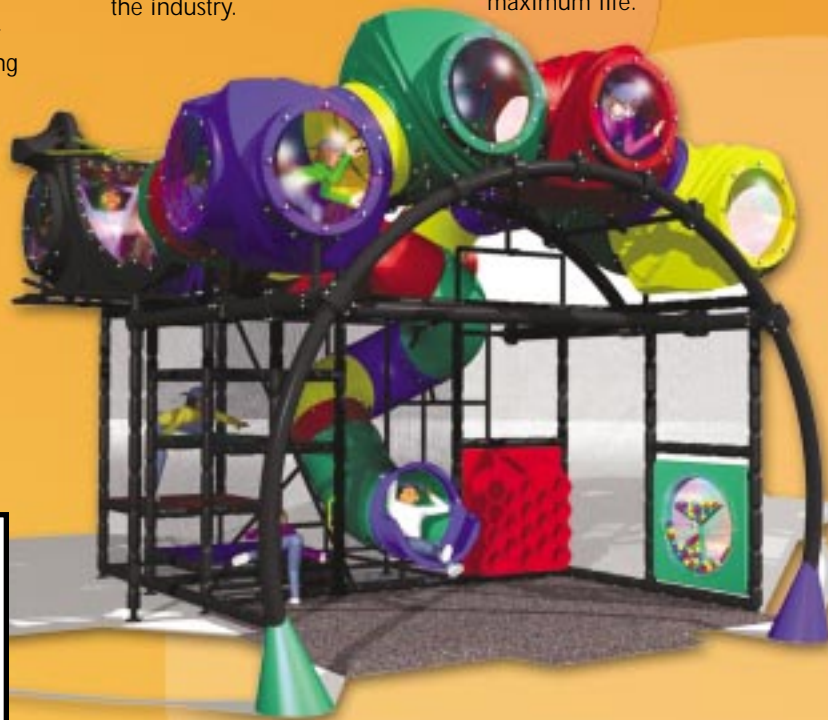

PLASTIC CONNECTIONS ARE MADE WITH OUR SPECIALLY DESIGNED HARDWARE FOR A SMOOTH FINISH ON THE INTERIOR AND EXTERIOR.

Corrosion resistant for maximum life.

DURANET IS USED FOR CONTAINMENT OF THE PLAYGROUND.

It provides good visibility and is virtually maintenance free.

Exposed Pipes are wrapped with tuff-skin foam, with a co-extruded exterior polymer coating that offers long life cushioning and comfort.

Our duradeck surfacing is a slip resistant cushioning rubber surface that meets all the Consumer Product Safety Commission tests, both head impact criteria and fall height requirements to reduce injuries.
