

Sustainability:

The earth is play friendly. So we're returning the favor.

We take environmental responsibility seriously. In fact, we've gone after it like a kid going after the monkey bars. And, just like the monkey bars, it's hard work – but totally worth it. Because taking care of the earth means safeguarding great spaces to play for generations to come.

The Pursuit of PVC-Free

We've eliminated 99.999% of PVCs from our play equipment thanks to Eco-Armor®, our super-durable alternative to traditional coatings. We'll eliminate the remaining .001% as soon as alternative supplies are available.

Carbon Footprint Reduction – for real

Some companies measure only what happens within their walls. We measure our entire carbon footprint for each playground we make, tracking all greenhouse gases generated by our company and our partners. It's the honest way to measure our real impact, and make a real difference.

We're big recyclers.

We recycle 93% of the waste we generate, and virtually all our playgrounds and packaging are made with recycled, recyclable and biodegradable materials. Right down to the glue on our boxes.

Lean and Green Manufacturing

We follow lean manufacturing standards. So do our vendors. More than 70% of our manufacturing supplies come from vendors within 150 miles of our facility. All of which means less fuel burned, and less energy consumed in transporting materials.

Cradle to Cradle Certified™ Silver

We're proud to be the only commercial playground equipment manufacturer to receive the prestigious Cradle to Cradle Certified Silver Certification*. Learn more about the non-profit Cradle to Cradle Products Innovation Institute at c2ccertified.org.
